Education

- **Aalto University** — Espoo, Finland
  Master of Science in Computer Science: Security and Cloud Computing
- **Aalto University** — Espoo, Finland
  Bachelor of Electrical Engineering: Automation and Control Systems

Experience

- **ABB via Academic Work** — Helsinki, Finland
  Software Engineer — *1.4.2026 - Present*
  - **Web Development**: Designing, planning, and iterating modern web solutions to expand and improve the existing product family using JavaScript/TypeScript, React, Lit, Node.js, REST APIs, WebSockets, Docker, and Podman.
  - **Manufacturing Execution Systems**: Developing and integrating web software for ABB's Manufacturing Execution System (MES), contributing to both frontend and backend functionality with integration to legacy systems.
  - **AI-Assisted Development**: Utilizing AI tools in the software development process and prototyped a AI/LLM-based integrations into existing industrial control systems web framework.
- **ABB** — Helsinki, Finland
  Web Development Trainee / Master's Thesis Worker — *1.6.2023 - 31.3.2026*
  - **Master's Thesis**: Researched context-aware Large Language Model assistance in industrial systems with the Model Context Protocol (MCP). "Enabling Context-Aware Large Language Model Assistance in Industrial Systems". Link
  - **Web Application Development**: Developed frontend and backend functionality for ABB's Manufacturing Execution System web software, primarily working with Typescript/JavaScript and LIT Library.
  - **Web Framework & Infrastructure**: Contributed to the development of underlying web frameworks and infrastructure as part of the R&D web development process.
- **Danske Bank** — Helsinki Metropolitan Area
  Seasonal Employee — *Jun 2021 - Aug 2021*
  - **Customer Communication**: Contacted clients who had submitted loan applications and discussed suitable loan options with them.

Projects

- **Personal Website**: Website for displaying CV information and projects. https://Miska-Mynttinen.fi
- **MCP LLM Database Context Integration**: Platform for LLM integration to databases through Model Context Protocol (MCP). Expansion/Remake of my Masters Thesis Project. Github

Programming Skills

- **Languages**: TypeScript/JavaScript, Python, HTML, CSS, SQL
  Technologies: Nodejs, Docker, React, REST APIs, AI/LLM integration, Model Context Protocol (MCP), Websockets, Oracle Database, PostgreSQL, Podman, Linux commandline, and LIT library
